Preface

Dear customer,

Thank you for choosing our product as your trusted partner. We ensure you that we always give our best as we produce this appliance by using the finest materials. NAYATI Gas Wok Ring Table is excellent choice to cook. In order to obtain maximum benefits of this appliance, please read this manual instruction carefully. Please notice the warnings and safety instructions to keep your safety. DO NOT use this appliance except its utility.

If you have any questions or difficulties in operating this appliance, please contact your dealer or NAYATI to acquire mechanic assistance.

NAYATI TEAM

1. General Information

1.1 Information for the Reader

Please read this manual instruction carefully before operating this appliance.
To find the specific topics of interest to you quickly, refer to the index at the start of the manual. This manual is written to:

All the information is instructed to general readers, i.e for users of the appliance.

All the information is instructed for special categories of reader, i.e. all skilled operators authorized to handle, transport, install, service, repair and scrap the appliance

The skilled operators may also read the information for the general readers for a more complete picture of the information provided if necessary.

1.2 Warning, Signs and Symbols

1.2.1 Warning

Warnings are indicated with a pictogram and a signal word.

The type and source of the risk as well as the consequences are described together with instructions for avoiding the danger. The margins of the pictograms and signal words used are explained in section "Signs" and "Symbols".

1.2.2 Signs

	Electric Shock Hazard or High Voltage Imminent danger → Non-observance leads to death or serious injury (caused by electric shock)
	Hot Surface Dangerous situation → Non-observance can lead to slight or semi-serious injury (caused by hot surface)
	Warning Damage → Non-observance can lead damage
	Pace Maker (Especially for Induction) Possible Danger → Non-observance can lead to death or serious injury
	Injury Risk Possible Danger → Non-observance can lead to death or serious injury
	PE → Connect wire to the earth

	Important → non-observance can lead damage
	Note → Note for special appliance
	Attention → Non-observance can lead damage
	User sign → information must be read by user
	Technician sign → information must be read by technician
	CE Certification → The appliance have a license of CE Certificate

1.2.3 Symbols

Symbols	Meaning	Explanation
1.	Instruction, single step	Instruction must be followed in the order given
2.		
Bullet points, such as “1.1”, “a”, “ etc	Instruction, multiple steps	Instruction can be carried out in any sequence
→	Instruction, multiple steps	An action is required here

1.3 General Information of the Appliance

Nayati Gas Wok Ring Table is an excellent cooking appliance made of stainless steel and cast iron. It consists of one burner with 11.5 kW (G30) or 13 kW (G20) power rate. This appliance is suitable for sautéing, shallow frying, frying, until boiling. Unit to be installed on open cabinet or similar elements, cantilever, or solid block solutions. This appliance equipped with wok ring adaptor. Therefore, the user can cook either with wok or pan. Featuring is rear seamless fitting to Amicus family products. It is very important to keep this instruction book together with the appliance for future consultation. If this appliance sold or transferred elsewhere, make sure this book goes with it. Therefore, the new user can read about its functions and other relevant information.

1.4 Procedure for Requesting Service and Warranty

1.4.1 Requesting Service

Contact one of the authorized service centers or NAYATI for all requirements. When requesting service, state the data provide on the nameplate and provide a description of the fault.

1.4.2 Warranty

NAYATI gives 12 months guarantee with certain conditions. NAYATI will decline any claims of accidents caused by improper use, disobey rules, and/ or disobey warnings. Below are cases, which invalidate the guarantee:

1. Improper use by untrained person(s)
2. Disobey local regulation(s) related to installation and safety standards
3. Not doing routine maintenance
4. Replace certain parts with non-genuine spare part
5. Do not follow the manual instructions properly

If you have any doubts or questions related to our product, please call your nearest dealer or call NAYATI.

2. Safety Instruction

 **Important!** Before installing, place the appliance on solid, flat, stable and horizontal surface and connection availability.

Read this manual instruction carefully before using NAYATI Gas Wok Ring Table. This appliance is for cooking only. Below are safety instructions that strictly conformed:

1. Improper installation, maintenance, cleaning, or modification to the appliance could lead to severe injury or death and could damage the appliance.
2. The mechanics must instruct staff regularly to avoid accident and damage of the appliance.
3. NAYATI Gas Wok Ring Table may be used for skilled staff only.
4. DO NOT place the appliance in a toxic area or have a risk of explosion.
5. DO NOT place the appliance near flammable materials such gasoline, fat, clothes, liquid gas, paper, etc.
6. DO NOT place the appliance in wet or humid room or condition such in rain or near water leaks, etc.
7. DO NOT use the appliance for drying clothes, paper, or living animals.
8. DO NOT use the appliance to heat non-food products.
9. Put the appliance in a good ventilated room.
10. Before cleaning or maintaining the appliance, detach the gas line and allow it to cool.
11. DO NOT touch the area  this sign means hot surface. Beware of severe burning injury.
12. DO NOT attempt to dismantle or repair the appliance. The authorized mechanics must do all jobs.

INJURY RISK!

- Avoid Gas Wok Ring Table installation next to fat Fryer.
- Water could splash into the Fryer and may injure the user.
- It is recommended to keep a safe distance between Gas Wok Ring Table and other kitchen equipment like Fryer.

3. Technical Data

3.1 Data Table

3.1.1 Technical Specification of Gas Wok Ring Table

Table 1 :

Technical Specification			
Model	NGWT 3-55/SN		
Overall Dimension (mm)	Width	Depth	Height
		400	600
Shipping Box Dimension (mm)	450	700	395
Cooking Surface WxD (mm)	Ø 330		
Rate	G30: 11.5 kW (9,890 kCal /h) G20: 13 kW (11,180 kCal/h)		
Gas Connection (G)	R 3/4 "

4. Handling and Installing

 **Important!** Before installing, place the appliance on solid, flat, stable and horizontal surface and connection availability.

The following instructions are intended for authorized and qualified installer. Before doing installation, adjustment, and maintenance operations, the installer must follow local and legal regulations. Cut the gas supply before doing any installation.

1. This appliance is using gas. Gas services should be installed according to:
 - a. Local and international standards
 - b. Local recommendation, such as building standards and recommendation concern with combustion
 - c. Directions and regulations from the gas and power supply companies
 - d. Regulation concern with prevention accident measures
2. Remove all packaging material and protective coatings.
3. Ensure gas supply is sufficient to operate this appliance.
4. Install the appliance by using Qualified Gas Filter.
5. Before testing, put the appliance in a good ventilated room and keep all flammable material away.
6. Take a leakage test by using soapy water solution. Spread the soapy solution on joints and pipe fitting. A leakage will be indicated by bubbles comes from the joints or pipefitting. Another way is by looking at the gas counter. If there is no movement on the gas counter, it means no gas leakage.
7. Before cleaning or maintaining the appliance, please isolate gas supply to the safe place.
8. Install the appliance by following Safe International Gas Standards.

WARNING!

Do not use free flame to find gas leak!

4.1 Packaging and Transport

4.1.1 Packaging

The packaging is designed to reduce space and as appropriate to the type of transport used. To simplify transport, some components may be removed and suitably protected and packed for transport.

The packaging carries all information necessary for loading and unloading. When unpacking, check that all components are present in the correct quantities and are undamaged. The packaging material must be properly disposed of in accordance with legal requirements.

4.1.2 Transport

Different means of transport may be used, depending partly on the destination.

During transport, fix the packaging to the means of transport securely to prevent undesirable shifting.

4.2 Handling and Lifting

The appliance can be handled using fork-lift or hook equipment of suitable load-carrying capacity. Before lifting, check the position of the load's centre of gravity.

Important! When engaging with the lifting equipment, watch out for the gas supply.

4.3 Safety Devices and Accessories

The appliance is provided with safety devices. The additional devices must be added if necessary to comply with the relevant legal requirement during the installation.

Important! Make the daily check that the safety devices are properly install and in good working order.

The appliance is equipped with the included or optional accessories. There is G20 Conversion Kit as included accessory.

4.4 Position and Fixing

1. Authorized personnel must do the installation.
2. Install the appliance according to National Safety Standard about gas-heated standard.
3. Place the appliance in good ventilated room with permanent ventilation ducts to guarantee sufficient exchange of air and keep the work place healthy.
4. If the Gas Wok Ring Table not connected to a flue, it is recommended to install it under efficient hood, which could evacuate burned gases and cooking steams. Below is construction type according to National Regulations:
A₁: Appliance without fan and does not have connection to a flue or to a device for evacuating combustion products outside the room. The combustion air and burned gas mixed in one room.
5. Make sure that any object around or under Gas Wok Ring Table does not obstruct air volume required for combustion.
6. Put away any flammable materials near Gas Wok Ring Table.
7. When the appliance is freestanding, keep a distance at least 10 cm from side, and rear walls. Especially when the appliance close to wall and does not protected with fire-resistant materials made.
8. Install the appliance separately or side by side with other appliance according to recommended range.
9. Put Gas Wok Ring Table on solid, flat, and horizontal floor.
10. Adjust the height of the four feet by using brackets.
11. Before turn the appliance ON, remove the protective film. Remove any adhesive with appropriate solvent. Eliminate all packaging material according to national laws.

4.5 Gas Supply Connection

1. Before installing and connecting Gas Wok Ring Table to gas supply, carefully control the fixed part of gas system, which conformed to National Building Regulation.
2. Verify gas pipes sections to guarantee sufficient supply for all gas heated appliances. Install it in similar condition to avoid excessive pressure drops.
3. The pipes must be made of steel (with junctions made using white cast iron, or galvanized steel fittings, or autogenously welded joints) or copper pipes (with mechanical joints and couplings without seals or mastics or brazed joints).
4. Control the gas bottle (if any) placed correctly and protected in dry area.
5. Check whether the gas pipes can easily inspected. If the pipes installed in floor and wall, make sure that this work done according to professional standard with reference points that make it possible to find the pipes.
6. Before installing Gas Wok Ring Table, make sure that it is set for the gas and pressure (see Technical Data Plates). Consult the paragraph "Gas Conversion".
7. Connect Gas Wok Ring Table to gas supply using solid fittings or flexible steel pipes with suitable sections related to nominal power and length.
8. Check whether the flexible pipes does not pass or near hot surfaces, put under stress and traction, contact with sharp edges, or other things that could damage the pipe.
9. Install quick ON – OFF valve between the gas mains and each single appliance where easy to reach.
10. After install Gas Wok Ring Table safely, take a pressure test the whole gas circuit by using leak finder spray or non-corrosive foams.
11. The Gas Wok Ring Table is equipped with ISO 7/ 1 screw thread, gas connection of ¾ inches diameter and suitable adapter for ISO 228/ 1 G screw thread gas connection are provided together with the appliance according to destined countries.

4.6 Checking Gas Pressure and Nominal Heat Input

At the first installation, specialized technician must control Gas Wok Ring Table nominal heat input, maintenance, and gas conversion. DO NOT improve Gas Wok Ring Table performance and increase nominal heat affirmed by the manufacturer. Control heat input by using gas counter and chronometer. Measure the exact amount of gas flow per unit of time which consumed by the appliance at maximum power. Compare the measurement to the consumption data on Data Technical Table 1, $\pm 5\%$ tolerance is allowed. When you are measuring top deviations, carefully check the diameters and the quality of installed injectors and gas main pressure. If you want to measure the main pressure while Gas Wok Ring Table is ON and using a pressure gauge for liquids (for example U manometer, with minimum resolution 0.1 mbar), please follow direction below:

1. Connect the flexible pipe "E" of the Manometer to the inlet pressure point "C" after unscrewing its cap.
2. Measure the connection pressure: if the reading is not within the values given in the following table, the appliance cannot work properly. The gas company must be informed to find out the supply pressure problems. If necessary, install a pressure regulator.
3. Once the connection pressure has been measured, disconnect flexible pipe "E", retighten the screw cap of the inlet pressure point "C". Restore the components inversely.

4.6.1 Gas Pressure

Table 6 :

Gas Type	Gas Pressure (mbar)		
	Normal	Minimum	Maximum
Natural gas G20	20	17	25
Natural gas G25	20	18	25
LPG G30/G31	28 / 37	20/25	35/45
LPG G30	50	42.5	57.5

C	= Inlet pressure point
D	= Gas pipe
E	= Flexible pipe
G	= Inlet gas connection
M	= Manometer
R	= Gas tap

Fig. 4

5. Gas Conversion

Only professional and qualified mechanic can do this job.

1. By looking “Adjustment”, replace Main Burner Injectors, Pilot Burner Injectors, and adjust correctly Primary Air Setting for each Main Burner.
2. Spare injectors are available with the appliance.
3. Make sure the diameter printed on each injector in 1/100 of a millimeter.
4. Convert the appliance after turn the gas OFF and in UP position and let Gas Wok Ring Table cool.

Important! On completion of the operation, make sure that there are no gas leaks or malfunctions

5.1 Gas Conversion

5.1.1 Main Burner Nozzle

- a. Lift the Burner (1) about 10 mm and pull from mixing chamber (3)
- b. Remove the fixing screw (2). This screw can be reach from below.
- c. Remove the complete mixing chamber (3) by turn anticlockwise from the Nozzle.
- d. Turn the pressure ring (4) from Nozzle. DO NOT lose the pressure ring.
- e. Remove the screw (5) and take the complete Nozzle unit.
- f. Remove the Nozzle from the Nozzle carrier and replace with the new one that suit to the table depend to the country and gas type.
- g. Fix the Nozzle with a non-hardening sealing tape.
- h. Replace the burner by following instructions to opposite direction. Notice the Primary Air Adjustment.

Fig. 5

5.1.2 Pilot Burner Nozzle

Adjust the Pilot flame according to natural gas. Follow direction below:

- a. Remove the covering screw (10) with washer (11) by using small screwdriver.
- b. Adjust Nozzle (C) to make Main Burner ignites well.
- c. Turn clockwise to reduce gas flow. Otherwise, turn anticlockwise to increase gas quantity.
- d. When operated with liquid gas, turn Nozzle (C) clockwise.
- e. Fix gas after regulating washer (11) and covering screw (10).

Fig. 6

5.1.3 Adjusting Main Burner Minimum Rate

Access By – Pass screw “A” of the gas tap after removing the handle and adjust it according to suitable gas. Follow these instructions:

- a. Natural Gas G 20: Adjust By – Pass screw until optimum minimum reached.
Once this has been done while the burner ON, check whether you go from maximum to minimum position, the flame does not backfire. Check flame stability at minimum rate.
- b. Liquid Gas G 30/ G 31: Screw By- pass right down.

A = By-pass screw of the gas tap

Fig. 7

5.1.4 Primary Air Adjustment

- a. Unscrew the bolt with an appropriated screw driver
- b. Move Primary Air Adjuster in order to reach the distance which according to the table (H)
- c. Retighten the screw cap again.

Table 7 :

Nominal Heat Input	Gas Type	Pressure (mbar)	Nozzle (mm)	Pilot Nozzle (mm)	Primary Air Adjustment H (mm)	Secondary Air Chamber	Air Chamber for Nozzle	By-pass Screw for Gas Cock (mm)
11.5 kW	G30/G31	28-30/37	Ø 1.80	Ø 0.20	12 mm Opened	Full Opened	Full Opened	Ø 0.95 *
		50/50	Ø 1.60					Ø 0.85
13 kW	G20	20	Ø 3.05	Adjusted	5 mm Opened	Full Closed	Full Closed	Adjusted
	G25	20	Ø 3.30					
		25	Ø 3.15					

• or Adjusted

Reduced Heat Input	Consumption	
3.00 kW	G30	0.907 kg/h
	G31	0.893 kg/h
	G20	1.376 m/h
	G20	1.376 m/h
	G25	1.600 m/h

WARNING!

After doing conversion please remember to:

- Attach an indelible sticker on technical data plate with the new installation data.
- Fix the new seals on the regulated parts (Primary Air Bushes and Main Injector).
- Take pressure test of gas circuit and check for leaks.
- Properly control Gas Wok Ring Table work according to these instructions.
- Please check main burners' cross-lighting, stability, and flame factor.

6. Use and Operation

6.1 Warning

This appliance is a gas cooker for professional use. It shall be used by authorized people only. Before starting, please make sure that the appliance is in good condition and put it in a good ventilated room. Below are several preliminaries warning that strictly conformed:

1. Check the gas supply whether it is in good condition and make sure that the air volume required for combustion is not obstruct by any object around or under the appliance.
2. If there is a persistent breakdown, please contact authorized mechanic.
3. User is only responsible for daily routine cleaning for maintenance.
4. Qualified mechanic must do operations related to installation and maintenance according to Regulation in force.
5. Use this Gas Wok Ring Table only for COOK FOOD: SHALLOW FRYING, FRYING, SAUTEING, until BOILING. DO NOT use the Gas Wok Ring Table for other purposes. Any other uses may be considered as improper and dangerous use. Please control the appliance when operating.
6. Before operating Gas Wok Ring Table for the first time, carefully clean the appliance to remove industrial oil/lubricant.
7. After using the Gas Wok Ring Table, close the gas valve in UP position.

6.2 Control Panel Description

6.2.1 For example NGWT 3-55 SN E

A : Gas Control Knob
to open and close the burner gas supply

Fig. 9

6.3 Switch ON/OFF

6.3.1 Turn Burner ON

1. Press and turn the Gas Control Knob to the “★” Position
2. Keep press the Gas Control Knob while ignite the Pilot Burner by using match or igniter gun. Check whether the Pilot Burner ignites.
3. Keep press the Gas Control Knob for ± 20 seconds and release the Knob.
4. If it fails to ignite, repeat the procedure (1,2,3).

6.3.2 Turn Burner OFF

1. Turn the security Gas Control Knob to the “0” position.
2. To extinguish the flame temporary, turn the security Control Knob to the ★ position. At this position, only Pilot flame remains lighting.
3. After cooking, extinguish all flames by turn the Gas Control Knob to “0” (zero position).

ATTENTION!

When you want to start the appliance in the cold condition (like in the morning after along time for not being used), you have to wait at least two minutes before turning the main burners on. Therefore, thermocouple can warm up and provide the voltage needed for the valve work.

6.4 Suitable Wok and Pan Type

6.4.1 Suitable wok type which can be used for NGWT 3-55 :

- Wok size \varnothing 330-355 mm

Fig. 10

6.4.2 Suitable pan type which can be used for NGWT 3-55 :

- Pan size \varnothing 203-381 mm

Fig. 11

7. Routine Cleaning and Maintenance

Clean the appliance to keep the functionality and durability. In the case of any failures, do not attempt to solve the problem but call your dealer immediately to ask for help. Do not attempt to dismantle the appliance, specialized mechanics must do all job.

For routine cleaning process, please follow procedure below and notice the warning:

1. Make sure the gas valve on UP position, the appliance is closed, and the entire burners are OFF.
2. Let the appliance cool.
3. Clean the steel part daily with warm soapy water, rinse and dry thoroughly. Please make sure that the cleaning product does not contain Chlorine (bleach, hydrochloric acid, etc), using steel wool, brushes, or scrapers that could leave ferrous particles. These materials could oxidize and causes rust on the appliance.
4. Spread a suitable degreaser on the plate and leave it to act for a few minutes.
5. Clean the plate thoroughly with a sponge, rinse with plenty of water and dry
6. Clean the burners with mild detergent or using soap and water.
7. Check the burners whether the holes are clogged. If necessary, use steel wool pad to remove deposits without damaging any parts of pilot unit.
8. DO NOT leave acid food such as vinegar, salt, lemon, etc on the stainless steel parts because it can ruin them.
9. NEVER wash the appliance with direct high-pressure jet water.
10. If the cooker will not used for a long time, briskly rub the steel part slightly with a damp cloth and Vaseline oil. After that, wrap with protective film and put the appliance in a good ventilated room.

ATTENTION!

- If you find the lighting and control devices are difficult to use, please contact the manufacturer immediately, which will provide you necessary assistance or call NAYATI dealer.
- Please check the appliance periodically for 6 months. Contact your dealer that will supply assistance to repair and set interval.
- Authorized and qualified personnel must do all service.

8. Trouble Shooting

Table 8 :

NO.	PROBLEM	CAUSE	CORRECTIVE ACTION
1.	The Pilot flame does not ignite	Gas pipe to Pilot closed	Check and repair. Check the gas supply.
		Pilot head clogged	Check and clean
		Pilot nozzle clogged	Check and replace
2.	Burner flame yellow	Primary Air setting incorrect	Check and repair
		Burner dirty	Check and clean
3.	Burner does not ignite	Gas valve damaged	Check and replace
4.	Pilot flame does not keep lighting	Thermocouple dirty	Check and clean with fine steel brush
		Thermocouple does not produce voltage (mV)	Check and repair
		Thermocouple slacked	Check and repair
		Thermocouple magnet damaged	Check and replace

Hints of Utilization /Remarks
Verwendungshinweise / Bemerkungen

Installation type: A1

Additional proved countries of destination, appliance categories and supply pressures:

AL, BG, MK, RS: II2H3B/P (20, 28-30 mbar)

AL, MK: II2H3+ (20, 28-30/37 mbar)

RO: II2L3B/P (25, 30 mbar)

In the NON-EU countries the CE-marking will be accepted as conformity approval if the Gas Appliance Regulation EU/2016/426 is transferred into national law by this countries.

10. General Exclusions

GENERAL EXCLUSIONS

- Damage to control knobs and buttons.
- Discoloration of components due to heat.
- Drainage does not meet requirements.
- Lubrication of moving parts.
- Corrosion caused by the use of chemical cleaners.
- Replacement of components due to internal contamination as a result of spillage or accumulation of grease/food debris due to a lack of cleaning.
- Cabinet, drawer and door seals are considered consumable items and will not be replaced under warranty.
- Light bulbs, lens covers and sticker display are considered consumable items and will not be replaced under warranty.
- Enamel coated components if impacted sufficiently will crack or chip, such damage is not covered by the terms of this warranty.
- Rectification where non-Nayati specified parts have been used.
- Where user error is established.

Gas general

- Poor combustion caused by lack of cleaning.
- Failure of components directly linked to poor cleaning and/or maintenance.
- Cleaning of burners jets.
- Cleaning/adjustment of pilots and thermocouples.
- Correction of gas pressure to the appliance.
- Renewing of gas supply fittings external to the appliance.

Electrical general

- Resetting of safety devices including fuses where no other fault exists.
- Renewing of supply cable ends.

Fryers

- Replacement of components damaged by cooking oils due to a lack of cleaning and care when replacing oil.
- Damage to thermostats.

Steamers

- Corrosion caused by high water hardness.
- Damage resulting from lack of water flow to the unit.

Induction

- Chipped or damaged glass not reported at time of delivery.
- Damage due to blocked or missing air filters.
- Damage to the generator due to wrong pan type/size used.

Gas Charcoal grills and salamanders

- Impact damage caused by the user due to misuse outside of the design scope.

Chargrill Radiant covers

- Radiant covers are considered consumable items and may corrode if not regularly cleaned due to prolonged contact with salt and fats and will not be replaced under warranty.
- Damage to heaters due to failure to replace radiant covers is not covered by the warranty.

Heated and chilled food displays

- Chipped or damaged glass not reported at time of delivery.
- Damage to components resulting from restricted airflow to inlets and outlet.
- Damage to components resulting from accumulation of airborne particles.
- Condensation on cold surfaces if units are installed in environments beyond specification.

Dishwashing

- Corrosion caused by high water hardness.
- Chemical pump due to misuse chemical agent.
- Washing accessories : basket, curtain.
- Malfunction caused by high water hardness.
